

Citrix Upgrade to Portal

Coming soon, all Citrix users will access their applications through a new site: <https://portal.mhsil.com>. The Portal site utilizes an upgraded version of Citrix software that offers enhanced functionality and stability.

On the new portal, some applications are tagged to a category, ex. Clinical Apps. Any application that isn't assigned to a category is accessible from the "Other" folder, located towards the bottom of the page. You can also search for any application using the "Search apps" box at the top of the portal. Any application can also be saved as a favorite by clicking the ribbon icon to the right of the application name. This will add the application to a "Favorites" category at the top of your portal.
