

# Clinical Overview MPage – Live May 11th

Inpatient & perioperative nursing will be receiving a new Clinical Overview mpage. This is a customizable and interactive page that will be a long term replacement of the Clinpic. This page is designed to provide an organized summary of patient information and a tool for handoffs and bedside shift report.

*\*\*\*The Clinpic is not being removed with this change. Removal is planned for the future.*

## Key Feature: Customization of Layout

This will be the new landing page on the Nursing Workflow tab. These tabs can be arranged per colleague preference. Pieces of the Clinical Overview can be rearranged by clicking and moving components to the colleague's choice.

## Key Feature: New Actions and Situational Awareness Component

- Purpose is to communicate non-clinical information to other colleagues.
- Actions are for specific tasks or requests that should be done.
- Situational Awareness & Planning are the good to know things about the patient.
- **This does not take the place of significant events.**
- **All comments are to be professional.**

1. Enter new comments into either field
2. When completed, Actions should be checked to keep the list tidy. These will be marked out & viewable
3. Have the option to show or hide completed actions
4. Marking Available to All displays information on the Physician Handoff (*only a small number of providers use this*)
5. You can edit and delete comments

## Key Feature: Vital Signs & Labs offers adjustable time frames and trending

	Today 12:00	11:00	10:23	10:00	09:00
Temp DegC	36.9	36.8	--	36.9	36.7
HR bpm	90	65	68	58	103
BP mmHg	167 / 62	146 / 450	--	123 / 48	152 / 67
Respiratory Rate br/min	33	24	24	18	51
Mean Arterial Pres... mmHg	93	77	--	67	91
O2 Sat Resting %	95	92	100	96	87
Cuff MAP MONITOR mmHg	--	--	--	--	--

1. Results timeframe filter to specify how far back to pull results
2. Select vital sign opens graphing
3. Graph displays

## Key Feature: I&O Component displays 24 hour totals

Intake and Output									
Selected visit (24 hour periods starting at 23:00)									
Today's Weight: -- Previous Weight: <b>186.40 kg</b> View Details Admission Weight: <b>161.10 kg</b> View Details Fluid Balance (Since Admission): <b>-3040 mL</b> View Details									
	APR 29, 2021 *	APR 28, 2021	APR 27, 2021	APR 26, 2021	APR 25, 2021	APR 24, 2021	APR 23, 2021	APR 22, 2021	APR 21, 2021
▼ Total Summary									
Intake mL	491	737	973	1605	2068	926	2705.8198	4580	2369
Output mL	1720	1568	3430	2660	4583	3569	3817	1590	1675
Fluid Balance	-1229	-831	-2457	-1055	-2515	-2643	-1111.2	+2990	+694

▶ Counts									

## Key Feature: New Transfer Handoff Component

- Purpose is to document the nurse receiving report from a transfer during handoff

Transfer Handoff						
Selected Visit Last 7 days						
	APR 26, 2021 08:24	APR 23, 2021 10:55	APR 22, 2021 09:08	APR 19, 2021 12:43	12:42	12:00
▼ Nurse Handoff 1						
Handoff Nurse Receivin...	Smegal RN, Matth...	Holmes RN, Briann...	--	Holmes RN, Briann...	Nickles , Amanda S	--
▼ Ungrouped Nonsequenced Results						
ED Care Measures 3	--	--	Ambulates without...	--	--	INF/RSV culture c... Labs drawn and S...

- A historical view of transfer handoff documentation
- To open documentation, select the down arrow on the component and select Transfer Handoff
- ED Care Measures are displayed to provide a view to see ED Nursing documentation

## Definition of Clinical Overview Components:

- Actions & Situational Awareness:** Ability to enter non-clinical communication between care providers
- Chief Complaint:** Displays documented Chief Complaint
- Emergency Contact:** Displays Emergency Contact Information
- Advance Directive Information:** Displays documented Advance Directive Information
- Allergies:** Displays documented Allergies. Can take users to Allergies window by select Allergies heading
- Medications:** Displays ordered meds, last 24 hour administered meds, and last 24 hours discontinued meds
- Assessment & Scores:** Displays documented assessment based scores (Braden, Fall, etc)
- Vital Signs:** Displays Vital Signs. Provides graphing ability
- Lines/Tubes/Drains:** Displays documented Lines, Tubes, Drains. Will pull in most insertion dates.
- Wound/Catheter/Ostomy:** Displays documented Wounds, Catheters, and Ostomies. Will pull in details.
- Intake & Output:** Displays documented I&O. Will also display weights. Provides graphing ability
- Oxygen/Ventilation:** Displays respiratory system specific documentation. Provides graphing ability
- Titratable Drips:** Displays documented Titratable Drips flowsheet information
- Labs:** Displays historical lab view. Will indicate abnormal results
- Microbiology:** Displays microbiology results and details
- Pathology:** Displays pathology results and details
- Documents:** Access last 50 documents. Filter is available to select documents to view
- Radiology Documents:** Access Radiology documents without going to results review
- Cardiovascular Documents:** Access Cardiology documents without going to results review
- Significant Events:** Displays documented significant events. Will not be a rolling list like Clinpic
- Past Medical History:** Displays documented problems and diagnoses
- Histories:** Displays documented procedure, family, and social history
- Implant History:** Displays documented implants
- Transfer Handoff:** Ability to document nurse receiving report during transfer
