

# Accu-Chek Less Than 70? You Must Act!

1. Repeat Accu-Chek to ensure accurate reading.
2. Immediately inform nurse of blood glucose less than 70.  
Report the time of the first Accu-Chek.
3. Within 10 minutes, give patient juice if requested by nurse.
4. Within 15 minutes of the treatment given to patient (juice or medication by nurse), repeat Accu-Chek.
  - ▶ Steps 1–4 need to be completed within 30 minutes of the initial Accu-Chek time.
  - ▶ If the repeat Accu-Chek is still less than 70, repeat Steps 2–4 above.
  - ▶ Do not give orange juice to renal patients.
